

PHILIPS TECHNICAL REVIEW

VOLUME 20
1958/1959

1
c 91/1

P H I L I P S T E C H N I C A L R E V I E W

A publication of the Research Laboratories of N.V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Twelve issues per year and an average of 32 pages per issue. The Review is published in four editions: English, Dutch, French and German, all identical in contents.

Editors

S. Gradstein, Editor-in-chief
D. M. Duinker, Deputy editor
M. Beun
C. M. Hargreaves
J. W. Miltenburg

All rights reserved by N.V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Articles may be reproduced in whole or in part, provided that the editors are first notified and that the source "Philips Technical Review" is mentioned in full. Photographs and drawings for this purpose are available on request.

Correspondence regarding subscriptions should be addressed to the distributors mentioned on the back cover of this issue.

CONTENTS

VOLUME 20, 1958/1959

LIGHT

	Page		Page
The "Electronic Poem" performed in the Philips pavilion at the 1958 Brussels World Fair, A. The light effects, by L. C. Kalff	37	Radio interference from fluorescent lamps, by H. J. J. van Boort, M. Klerk and A. A. Kruithof	135
The life of ballasts for gas-discharge lamps, by T. Hehenkamp, I. Transformers and chokes	59	*Automatic recording of luminous intensity diagrams, by W. Bähler	288
II. Capacitors	162	Transistor D.C. converters for fluorescent-lamp power supplies, by T. Hehenkamp and J. J. Wilting	362

TELECOMMUNICATIONS

Noise, by K. S. Knol	50	The EC 59, a transmitting triode with 10 W output at 4000 Mc/s, by V. V. Schwab and J. G. van Wijngaarden	225
*A noise diode for ultra-high frequencies, by H. Groendijk	108	Precision variable capacitors, by A. A. Turnbull	234
Printed wiring in radio sets, by R. van Beek and W. W. Boelens	113	Electron emission of materials for electron tubes, by G. A. Espersen and J. W. Rogers	269
The junction transistor as a network element at low frequencies, III. Stabilization of the operating point, in particular with regard to temperature changes, by J. P. Beijersbergen, M. Beun and J. te Winkel	122	Transmitting valves for use in industry, by E. G. Dorgelo	299
Radio interference from fluorescent lamps, by H. J. J. van Boort, M. Klerk and A. A. Kruithof	135	*Colour television in medical teaching, by W. A. Holm and F. H. J. van der Poel	327
		*The port of Rotterdam radar system, by B. H. G. Prins and J. M. G. Seppen	349

SOUND

The "Electronic Poem" performed in the Philips pavilion at the 1958 Brussels World Fair, B. The sound effects, by W. Tak	43	Modern acoustical engineering, I. General principles, by D. Kleis	309
--	----	---	-----

X-RAYS AND NUCLEAR PHYSICS

*A simple and compact arrangement for measuring the β -activity of weak radioactive samples, by K. van Duuren	170	Distant-focus X-ray tubes, by A. H. G. Kuntke	291
The scintillation counter, by J. A. W. van der Does de Bye	209	An apparatus for cinefluorography with an 11-inch X-ray image intensifier, by J. J. C. Hardenberg	331
Signal-to-noise ratio and dead time of a scintillation counter, by J. A. W. van der Does de Bye	263		

*) Articles marked with an asterisk are brief reports.

MEASURING EQUIPMENT

*An experimental pyrometer using a photo-transistor and designed for radio-tube inspection, by F.H.R. Almer and P.G. van Zanten	89	*A method of measuring the resistivity and Hall coefficient on lamellae of arbitrary shape, by L. J. van der Pauw	220
*A noise diode for ultra-high frequencies, by H. Groendijk	108	Signal-to-noise ratio and dead time of a scintillation counter, by J. A. W. van der Does de Bye	263
The production and measurement of ultra-high vacua, by A. Venema and M. Bandringa	145	*Automatic recording of luminous intensity diagrams, by W. Bähler	288
*A simple and compact arrangement for measuring the β -activity of weak radioactive samples, by K. van Duuren	170	*The use of thermistors in the ebullioscopic determination of molecular weights, by J. G. van Pelt	357
The scintillation counter, by J. A. W. van der Does de Bye	209		

MATERIALS AND THEIR RESEARCH

Lattice imperfections in crystals, studied on alkali halides, by Y. Haven	69	*Topotactically crystal-oriented ferromagnetics, by F. K. Lotgering	354
*An apparatus for testing the solderability of wire, by J. A. ten Duis	158	*The use of thermistors in the ebullioscopic determination of molecular weights, by J. G. van Pelt	357
*A method of measuring the resistivity and Hall coefficient on lamellae of arbitrary shape, by L. J. van der Pauw	220		

MISCELLANEOUS

The Philips pavilion at the 1958 Brussels World Fair	1	Science and industry, by H. B. G. Casimir	85
I. The architectural design of Le Corbusier and Xenakis, after Y. Xenakis	2	*Enclosed welding of rail sections, by G. Zoethout	94
II. The hyperbolic-paraboloidal shell and its mechanical properties, by C. G. J. Vreedenburgh	9	An experimental induction-heating generator using hydrogen thyratrons, by H. L. van der Horst and P. H. G. van Vlodrop	101
III. Model tests for proving the construction of the pavilion, by A. L. Bouma and F. K. Ligtenberg	17	The production and measurement of ultra-high vacua, by A. Venema and M. Bandringa	145
IV. Construction of the pavilion in prestressed concrete, by H. C. Duyster	27	A small air fractionating column used with a gas refrigerating machine for producing liquid nitrogen, by J. van der Ster and J. W. L. Köhler	177
The "Electronic Poem" performed in the Philips pavilion at the 1958 Brussels World Fair,		*Influence of the Peltier effect in resistance welding, by T. C. Balder	188
A. The light effects, by L. C. Kalff	37	A fast method of reading magnetic-core memories, by H. J. Heijn and N. C. de Troye	193
B. The sound effects, by W. Tak	43	The Philips hot-gas engine with rhombic drive mechanism, by R. J. Meijer	245
C. The electronic control system, by S. L. de Bruin	45	Photo-resistors made of compressed and sintered cadmium sulphide, by N. A. de Gier, W. van Gool and J. G. van Santen	277
The life of ballasts for gas-discharge lamps, by T. Hehenkamp,			
I. Transformers and chokes	59		
II. Capacitors	162		

*) Articles marked with an asterisk are brief reports.
